SAP Failures and Testing Challenges

02

Top SAP failures across the globe.....

Haribo, European company known for making gummy bears, suffered huge losses due to a completely disrupted Supply Chain

| lack of proper testing

Lidl, a German supermarket chain, experienced system failure resulted in problems with stock availability and distribution.

| Insufficient testing and improper data migration

Hershey's, SAP system failure resulted in difficulties in managing orders and inventory, leading to delays in production and shipping during the peak Halloween season

|  Inadequate testing and insufficient time for end-user training

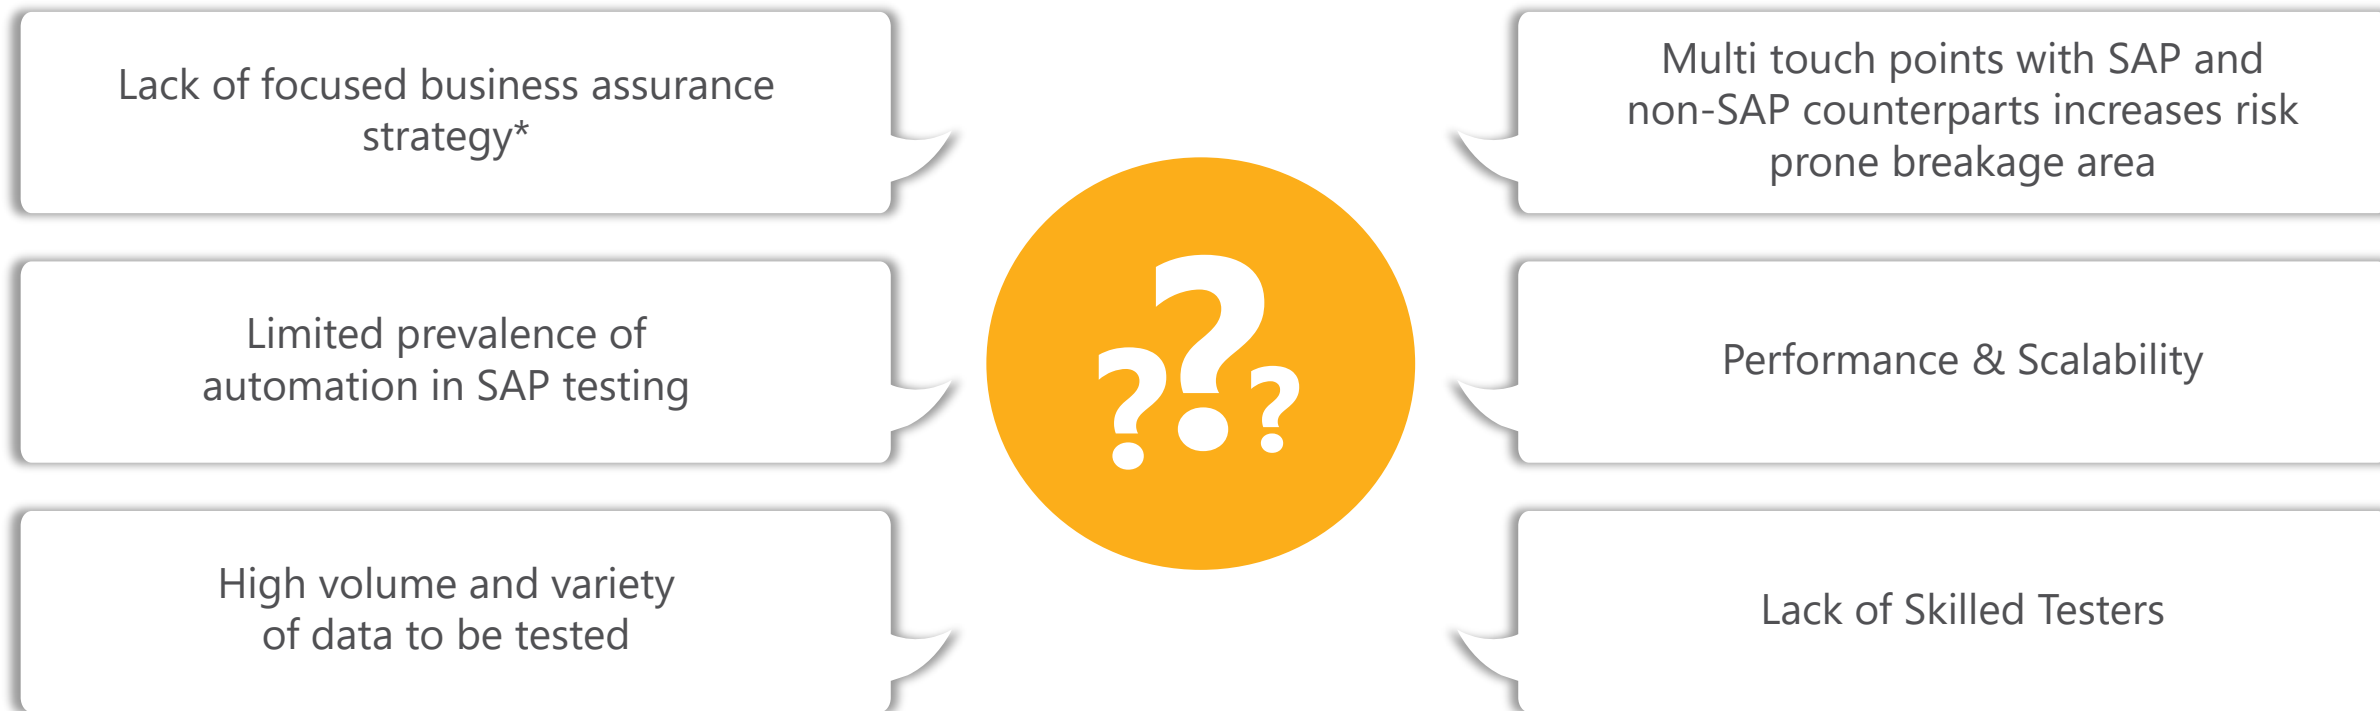

Avon, a global beauty company, struggled to fulfill orders and experienced problems with product distribution, leading to financial losses and customer dissatisfaction.

|  in part, to inadequate testing of the new SAP system

THE ONLY WAY TO AVOID THIS IS BY TESTING IT RIGHT

Why SAP Testing is a challenge?

Modern SAP environments are constantly changing with rapid, inflexible release cycles and other development changes, which brings new challenges in SAP Testing space also.

Each of these challenges has the potential to impact your SAP system massively and disrupt your business operations

* Forrester Report -Two-thirds of organizations do not have a dedicated budget for SAP end-to-end testing.

Cygnets's SAP Testing Offerings and Accelerators

03

Our SAP Testing Services to EMPOWER your Business Operations.....

SAP Testing Accelerators

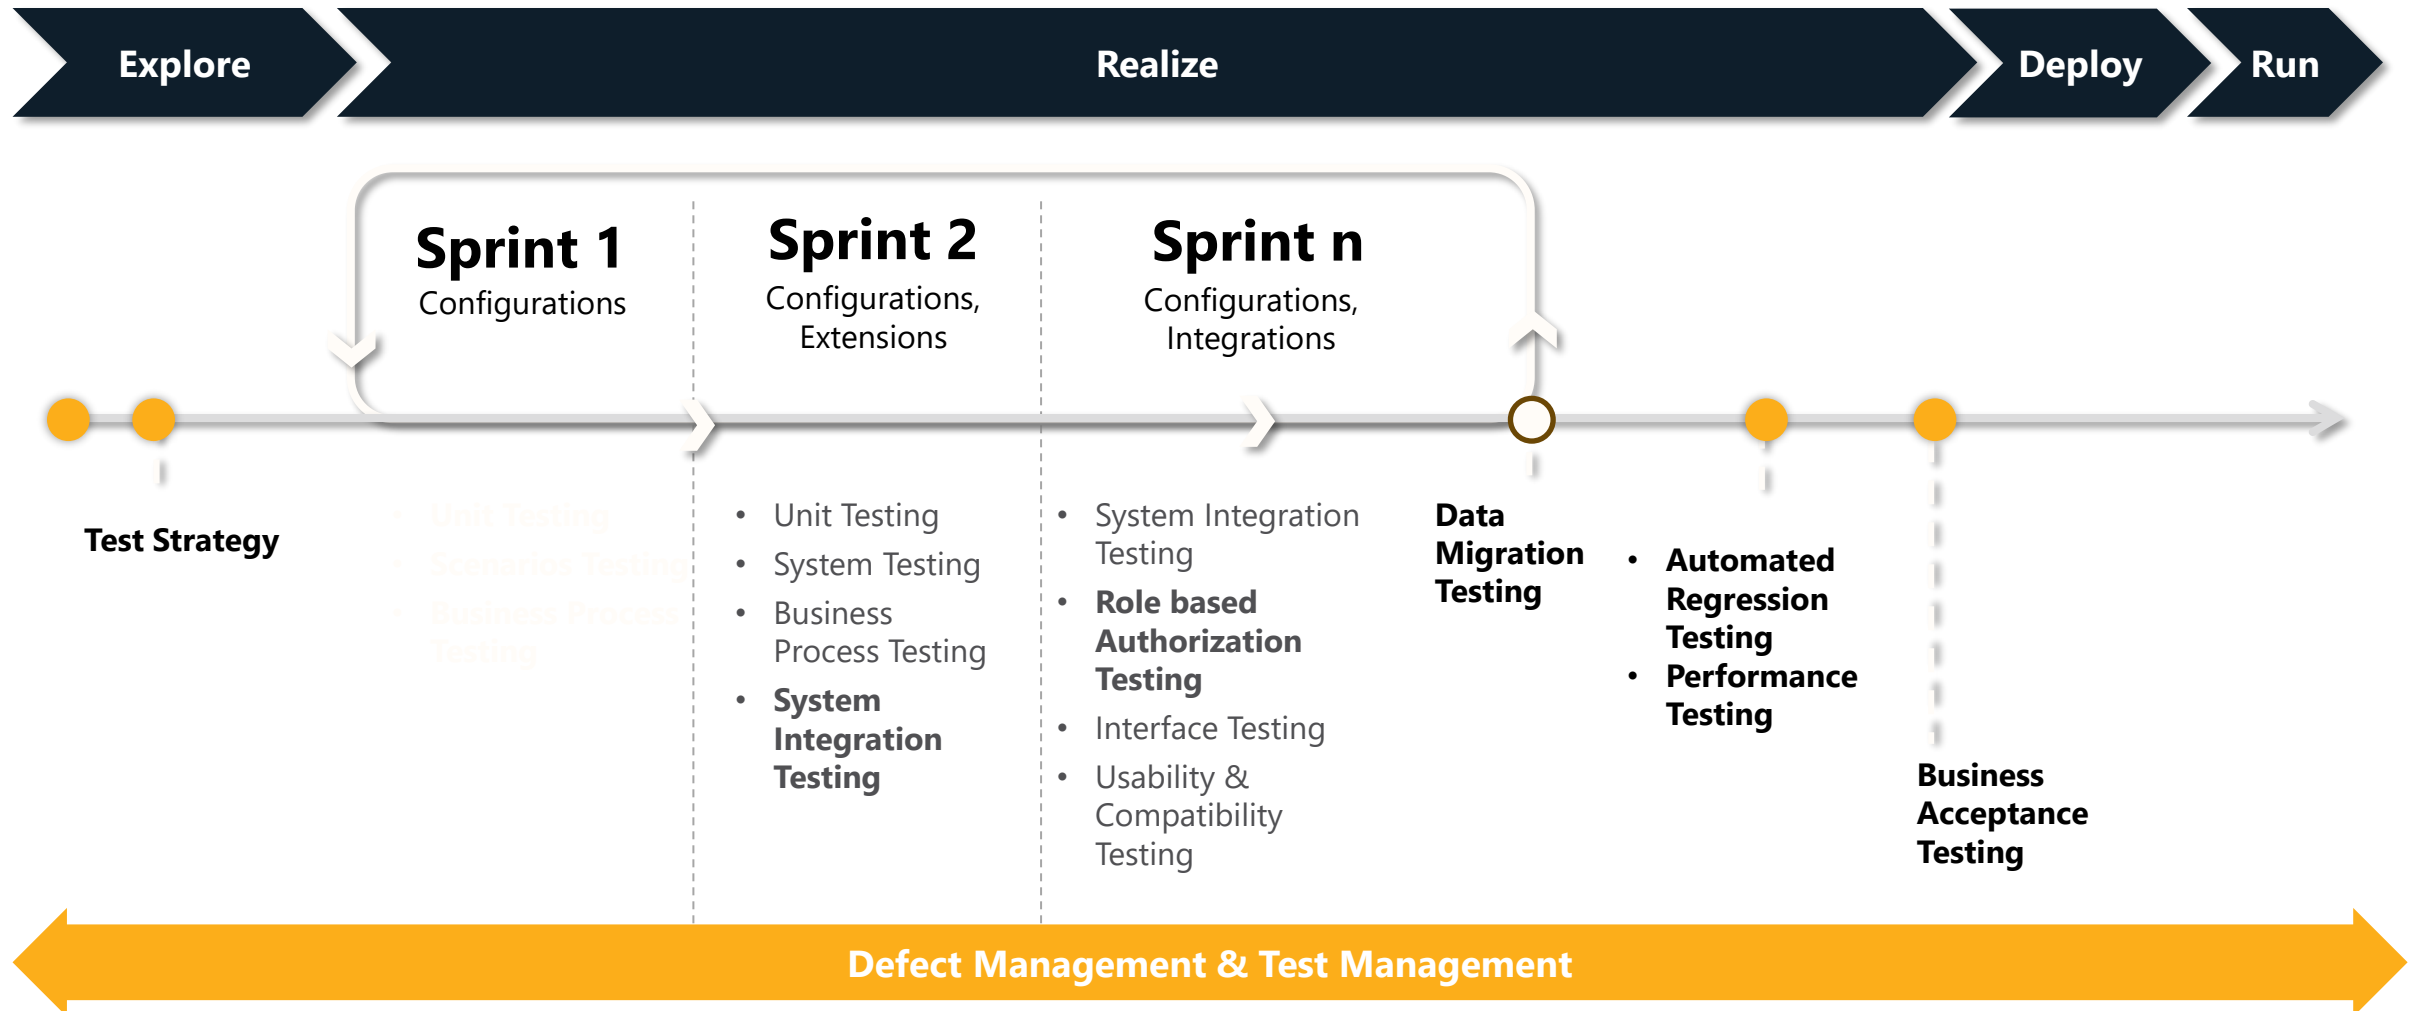

To ensure faster, more reliable, and cost-effective testing for SAP Applications

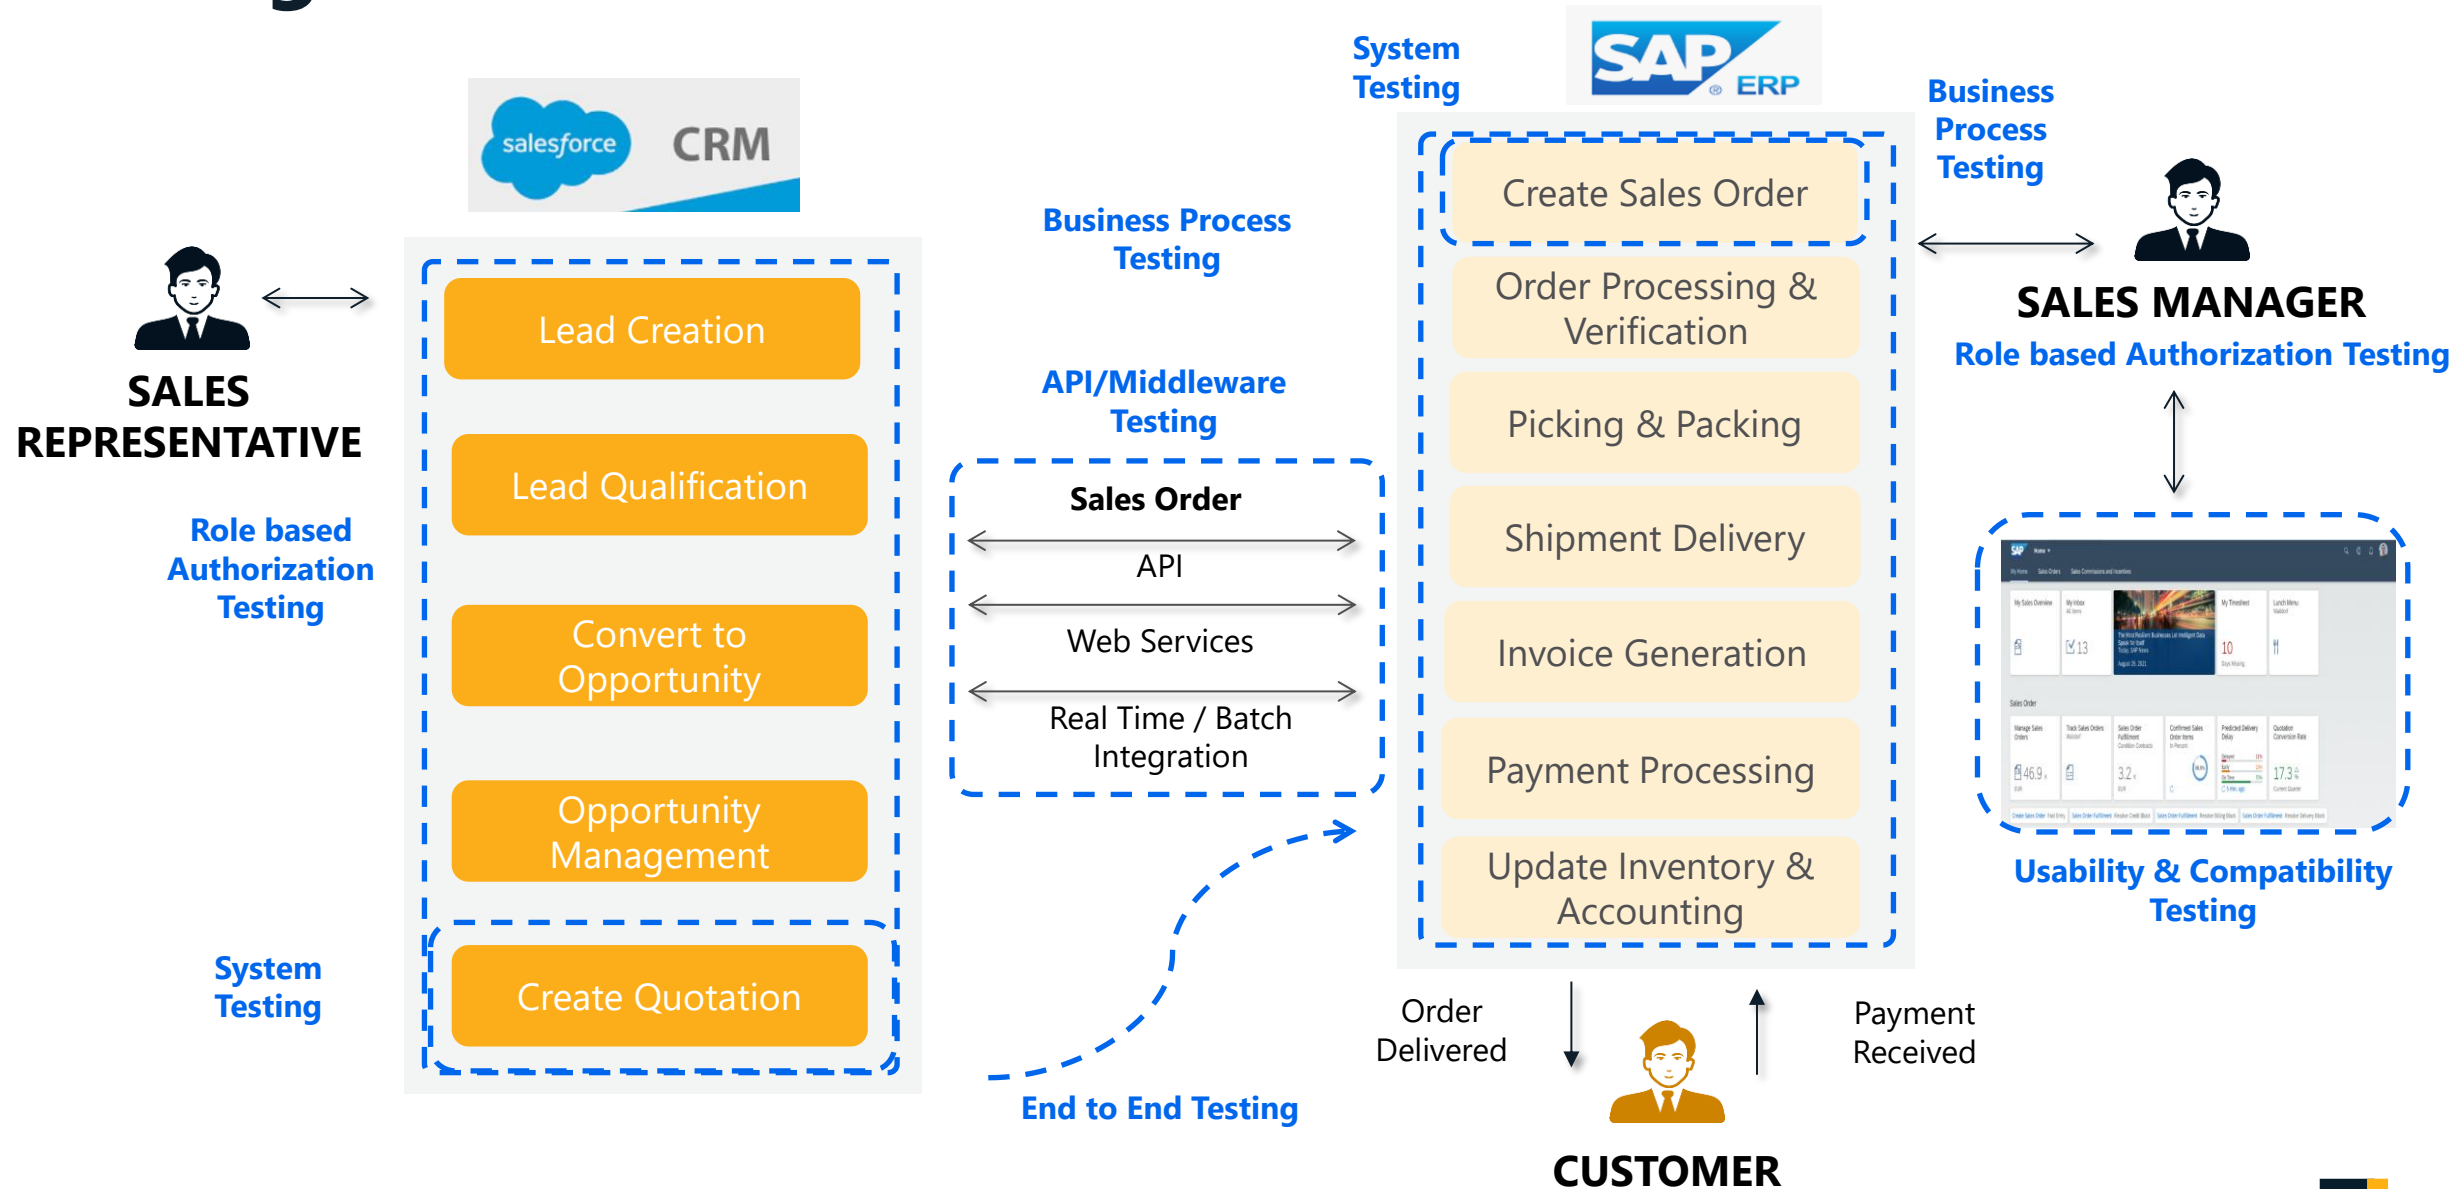

SAP Testing Approach and Use Cases

04

Our Testing Approach Aligned with SAP ACTIVATE

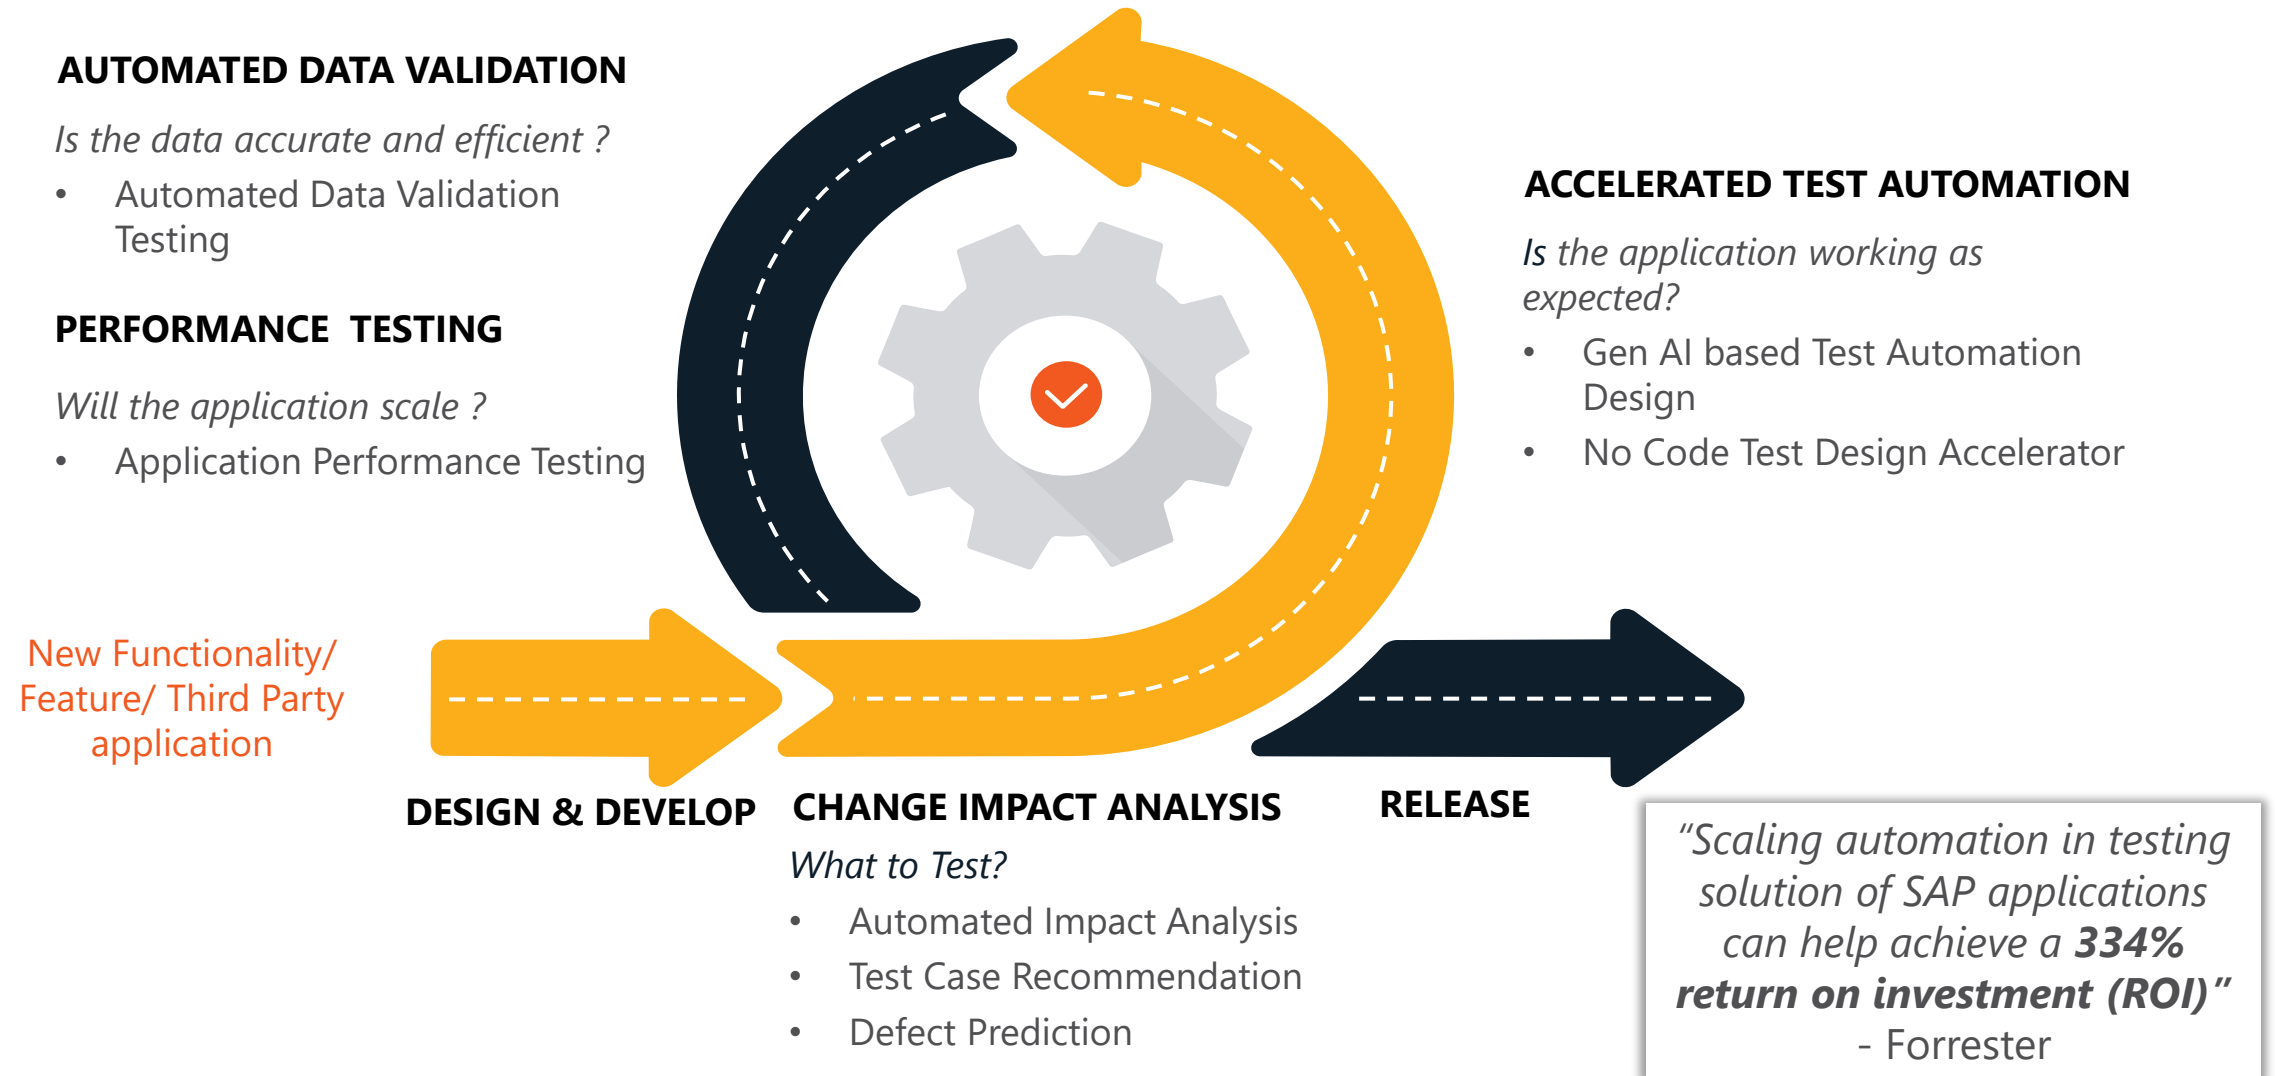

Testing Use Cases

Infusing Intelligent Automation in SAP Testing Value Chain

Our proposition worth exploring

Value Proposition and Success Stories

05

Value Proposition

10X Faster Testing

Accelerated testing – Enabling you to implement change at scale that moves as fast as your business

90% Risk Reduction

Reduce risks of potential business downtime due to improper testing at every layer including Business, Data and Functionality

60% Cost Savings

Ready to use Automation Platform and Reusable Accelerators shrinks test design and maintenance costs by 60%

Faster Time to Market

With autonomous testing, experience more frequent deployments and change cycles

More Value-add Works

Free Up your Functional SME for more value-add works

Automation testing in Manufacturing

Our client is an Indian automotive manufacturing company which produces cars, trucks, buses and coaches.

★★★
Customer
Success through
the power of
digital

Requirement /Challenges

- Manually processing volumes of data
- Requirement of bifurcation of the data of mismatched invoices and invoices unavailable on their SAP System
- Complicated data management

Solution

- Implemented TestingWhiz validators.
- Extract data from the invoices and Validates the Data [100+fields validations]
- Automated MIRO process in SAP with Invoice Data

Benefits

75%

Productivity Improvement

90%

Increased Processing Speed

50K

Invoices in 12 months

THANK YOU
