

# Reimagine Digital Assurance

Future-Proof Your Enterprise with  
Cygnet.One's AI-First Quality Engineering

# Is Your Quality Assurance Ready for the Future?

In today's hyper-speed digital world, traditional QA is falling behind. Enterprises face mounting pressure to deliver faster, reduce costs, and ensure flawless user experiences – often an impossible balancing act..

## Our Vision:

AI-First Quality Engineering at Cygnet. One, we believe it's time to Reimagine Digital Assurance. We empower you to move beyond reactive testing to proactive, intelligent quality engineering that future-proofs your enterprise and turns quality into your competitive advantage

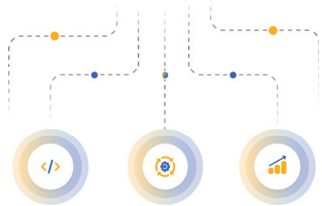

# Reimagine Digital Assurance with Cygnet.One

Future-Proof Your Enterprise with AI-First Quality Engineering.

**Digital Agents** that Understand, Adapt, and Accelerate Assurance.

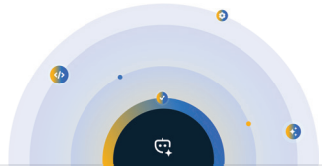

## Test Design Agent

Transform text-based descriptions into automated test scripts with our context-aware AI test agents that understand and adapt and code seamlessly.

## Support Agent

Boost testing efficiency with our AI test agents—automate documentation, gain real-time insights, and access on-demand test support without SME dependency.

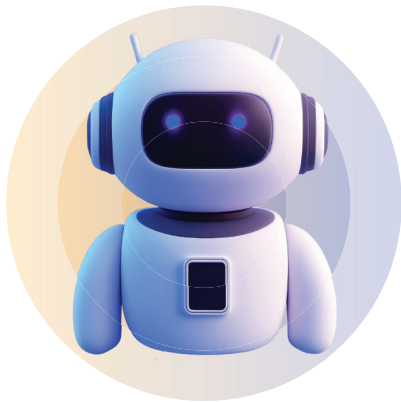

## Healing Agents

Self-healing test agents auto-adapt to runtime changes, reducing maintenance and preventing false negatives.

## Cygnets Next Gen Quality Engineering Services

Cygnets One delivers exceptional quality services with agile, low-cost, high-impact testing solutions. Our AI-led accelerators seamlessly integrate into your ecosystem, enhancing service delivery and driving excellence across the entire quality engineering lifecycle.

### QEXcelerate

A strategic accelerator transforming people, processes, and technology to elevate test maturity and scale quality engineering impact.

### RapidQ

A suite of accelerators that transforms testing speed and efficiency through reusable frameworks, smart utilities, and pre configured components.

### SmartQE Hub

Orchestrating AI-driven, tool-agnostic QE use cases to empower intelligent, scalable, and adaptive quality engineering.

### TestingWhiz

A low-code automation platform that accelerates testing across back, middle, and front-office applications, driving speed, accuracy, and seamless digital transformation.

# Tangible Benefits, Lasting Assurance. Partnering with Cygnet.One for AI-First Quality Engineering means:

## Exceptional Quality

Drastically improve software reliability and user satisfaction.

## Accelerated Delivery

Release faster with intelligent automation and reduced bottlenecks (clients see up to 30-40% faster releases).

## Significant Cost Reduction

Lower operational and maintenance costs (up to 53-60% overall cost reduction).

## Enhanced Test Coverage

Achieve comprehensive assurance (up to 88-95% improved coverage).

## Reduced Manual Effort

Free up your skilled teams for strategic initiatives (up to 65-70% effort reduction).

## 25 Years

of Quality Engineering Expertise,  
Amplified by AI Innovation.

## Ready to Reimagine Your Digital Assurance?

The future of quality is intelligent, adaptive, and integrated. Don't let outdated QA practices hold your enterprise back.

Book a call with our quality experts to experience the power of Cygnet.One's Intelligent Digital Agents firsthand.
