

PORTFOLIO OF PROTECTION

The Layered Protection You Need.

VIPRE SECURITY AWARENESS TRAINING

VIPRE EMAIL ADVANCED THREAT PROTECTION & SAFESEND

VIPRE ENDPOINT DETECTION & RESPONSE (EDR)

“
VIPRE is an awesome product. It's super-fast & 100% reliable.
Sean Connolly, Network Manager, DCA, LLC”

GETTING PHISHING EMAILS?

Keep incoming & outgoing emails safe from risk & leaks with **Email Advanced Threat Protection**.

- Protect against weaponized URLs, QR Codes, & attachments.
- Protect against email impersonation & spoofing.
- Ensure your email keeps running even if your server goes down.
- Customize both your inbound & outbound email filtering with advanced policy settings.
- Built-in end user education for additional protection against phishing attacks.
- Encryption option for fully private communications.
- Prevent data breaches via email through our data loss awareness tool **SafeSend**.

WORRIED ABOUT A DATA BREACH?

Your employees are your first & last line of defense against cybercrime. Educate them to identify risks & do the right thing with **Security Awareness Training**.

- Multi topic training sent directly to an end user to improve awareness.
- Tailored courses to suit the needs of all your users.
- Gamified learning experiences increase motivation.
- Phishing simulations to enhance your employees' ability to spot a malicious email.
- Real-life, relatable scenarios increase engagement & impact.
- Meet regulatory & compliance needs.

CONCERNED ABOUT RANSOMWARE?

Help prevent ransomware & recover from attacks with **Endpoint Detection & Response**.

- Identify “suspicious” before it becomes “malicious”.
- Find, contain, & fix malware infections.
- Restore all your data by rolling back any changes made by zero-day ransomware.
- Meet compliance & cyber insurance requirements.
- Automatically update & patch vulnerabilities within your network.
- Certified by experts with a high detection rate of viruses, worms, & other malware.

OVER 25 YEARS OF SECURITY LEADERSHIP

You can rely on **VIPRE** to immediately address today's security concerns and tomorrow's challenges. We are constantly innovating and improving upon our comprehensive and multi-faceted portfolio of security products and we strive to deliver the highest value throughout your organization's security journey.

99.9% Spam Prevention

VIPRE EMAIL ADVANCED THREAT PROTECTION

Make your emails safer with **VIPRE Email Advanced Threat Protection (ATP)**. It stops dangerous attachments with Attachment Sandboxing and checks risky links and QR codes with Link Isolation to keep your email secure.

Get more convenience with anti-spam/anti-phishing tools, enhanced email routing, and policies for handling emails, plus threat protection to keep your email running smoothly. You can also add Email Encryption for extra security and efficiency.

VIPRE SafeSend is a Data Loss Awareness tool that ensures your outgoing emails are safe from user error and leaks of confidential information. This Outlook plugin alerts the sender if emails are addressed to the wrong people or contain sensitive data based on your own bespoke rules.

Increase Phishing Resistance by up to 98%

VIPRE SECURITY AWARENESS TRAINING

Help your employees avoid cybersecurity mistakes and follow defense best practices with **VIPRE Security Awareness Training (SAT)**.

Using award-winning training content from Inspired eLearning™, teach your team about staying safe online and avoiding costly mistakes. Our engaging training helps them learn more effectively and remember what they've learned for longer periods of time.

Our training includes simulated phishing tests, fun games, and short lessons to help keep employees up to date with emerging trends. Create lasting, positive changes in employee behavior and a cybersecurity-conscious culture within your business.

99.6% Malware Protection Rate

VIPRE ENDPOINT DETECTION & RESPONSE (EDR)

VIPRE's solution keeps your system safe by combining advanced antivirus protection (NGAV) with detection and response features (**EDR**) in one package.

It's packed with security features and backed by world class detection engines capable of detecting zero-day viruses, worms, and other malicious software, DNS protection for an added layer of security between your employees and the Internet, and tools to stop ransomware before it can cause damage to your computers and network.

Identifies and automatically closes vulnerabilities present in your devices and the applications installed on them with built in app scanning and patching.

Deploys, runs, and is managed with minimal disruption to your employees' day-to-day activities.
