

Cygnnet.One Managed IT & Cybersecurity Services

Always-On Operations. Always-Secure Infrastructure.

When your business spans time zones, downtime or security gaps aren't an option. Cygnnet.One delivers 24x7 Managed IT and Cybersecurity services that keep your infrastructure running, monitored, and protected – end to end.

Our Service Spectrum

24x7 NOC & SOC Monitoring

NOC (Network Operations Center):
Continuous infrastructure and system monitoring

SOC (Security Operations Center):
Security alert detection and response

Incident reporting:
As fast as **5 minutes** for critical events

Authorized remediation:
We don't just alert we act, when pre-approved

Infrastructure & Cloud Management

End-to-end management across **on-premise, hybrid, and cloud environments** (AWS, Azure, GCP, IBM)

Cost optimization, patch management, change control, and SOP/playbook implementation

Technology-agnostic: from mainframe to modern cloud

Delivery Flexibility

Shared service model:
24x7 coverage without resource gaps

Dedicated model:
Named experts for specific environments

Remote, onshore, or hybrid delivery aligned to your business rhythm

Top Challenges We Solve

Your Challenge

- High cost of 24x7 coverage
