

CLOUDIMPACT

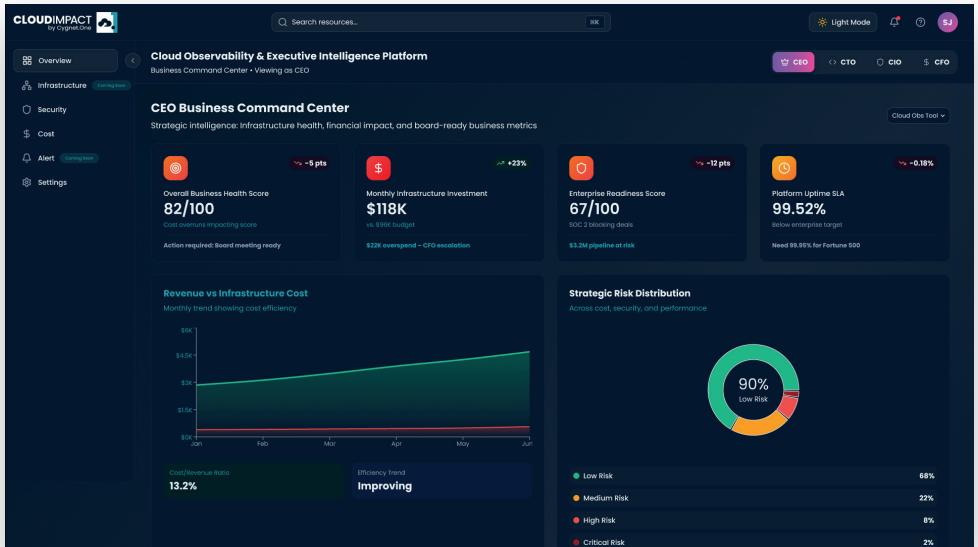

by Cygnet.One

Multi-Perspective Cloud Intelligence

Infrastructure Health at Board-Ready Resolution

Converts cost, performance, security, and governance signals into CXO-ready intelligence, without manual reviews or dashboard setup.

CloudImpact Score

0 to 100 health score across cost, performance, security, and governance.

Persona-Aware Insights

CFO, CIO, and engineering views from the same cloud telemetry.

Prioritized Recommendations

Action queues ranked by cost, risk, SLA impact, and governance exposure.

Continuous Cloud Analysis

Always-on monitoring across AWS & Azure with faster anomaly detection.

From Fragmented Signals to Decisive Action

Most cloud environments create constant telemetry. CloudImpact turns those signals into business-context intelligence, ranked by what each role needs to act on first.
